

GSH in PBMCs, Patient G

**Thyone™-500, Given Orally, Markedly Raises Glutathione Levels
Inside the Immune Cells of HIV Positive People.**

Dosage Regimen	Responders	Percent Increases
3 grams/day 1.5 Grams, 2x/day	100% 6 out of 6 people Average Ranges:	53% - 99%
2 grams/day 1.0 grams, 2x/day	75% 6 out of 8 people Average Ranges:	42% - 87%
1 gram/day 0.5 grams, 2x/day	40% 2 out of 5 people Average Ranges:	8% - 60%

These results show a dose-response effect in that 3 grams/day result in positive responses, in more people, and the responses are greater...compared to 2 grams/day, and 1 gram/day.
